

AmbiSecure ONE Pass Card

A cybersecurity division of
Ambimat Electronics

Ambimat under the brand AmbiSecure manufactures products that are designed by experts in the field of cybersecurity. Our products are designed and manufactured securely in India using stringent processes and a secure supply chain for trustworthy components. AmbiSecure helps modernise authentication with ease, bridging legacy MFA to modern protocols such as FIDO2, PIV and OpenPGP.

Product Capabilities

AmbiSecure ONE Pass Card is an indigenous development of the Digital Signature token on a Smart Card. It also supports other PKI based applications like OpenPGP and PIV.

The AmbiSecure ONE Pass Card also supports the FIDO protocol and is certified by the FIDO Alliance.

We provide multi factor authentication solution using various hardware devices and software solutions that go hand in hand to safeguard systems against ransomware and malware attacks. We also provide custom design and development services for various products such as USB devices, Smart Cards, Smart Card Readers etc.
